

## MODULAR TI BUTTS

ForTitude's Modular Ti Butts are constructed from solid military grade titanium and high-yield alloys, for unmatched toughness and strength-to-weight ratios. Impervious-to-corrosion in saltwater, delivering inheritable performance and lifetime maintenance-free durability.

The first of 3 patent pending connectors can instantly swaps-out rod blanks in seconds if a guide breaks or you simply want to use a lighter/heavier rod. The second, a patent pending "Lock & Load" reel connection allows reels to be instantly snapped on-and-off like an ammunition magazine. An adaptor connects to the reel foot which is then snapped on. Eliminated, is loose or slipping handles, constant rinsing & cleaning, fusing & cracking of inferior aluminum ferrules, threading, nuts and hoods.

Third, is the handle connector that allows for extensive and instantaneous fish on-the-line customization. Assembly takes seconds with a simple push & twist insuring hold and locking. Keep things sporting by swapping-out handles and instantly go from a "curved" or "straight butt" to a stand-up "short-butt" without interrupting the fight.

Removable tapered butt-donuts firmly secure butts in rod holders. With or without a donut, sleeker more efficiently designed handles have incredible uniform strength characteristics, they are easier to maneuver and they allow handles to fit comfortably under one's arm while fishing, setting, transporting or maintaining the rod. No more 1970's era bulky aluminum or cheap plastic butts.

### FEATURES:

- » Affordable titanium technology
- » 200% stronger than stainless
- » 45% lighter than stainless
- » Impervious to corrosion
- » Sleek efficient design
- » Instant Lock & Load reel seat (patene pending)
- » Fish-on exchangeable handle (p.p)
- » Modular rod blank connector (p.p)
- » Inheritable durability
- » Maintenance-free
- » Lifetime warranty
